

# Science Long Term Plan

*Revised September 2025*

## Intent:

- To provide children with an understanding of how science impacts us everyday
- To inspire and inform children of future possibilities for them in science both locally and nationally
- To give children a broad range of scientific experiences
- To develop children’s enquiry skills so they can ‘think like a scientist’

Year Group	Autumn 1	Autumn 2	Spring 1	Spring 2	Summer 1	Summer 2
Pre-school (2 year olds)	<p><b>Throughout the year</b> our two-year-old children will be exploring all of the below science strands through the area of <b>Understanding the World</b>. These <b>will not be taught as single units</b> or lessons but key knowledge and skills from the progression documents, from each strand below, will be introduced through <b>multiple opportunities</b> to <b>explore</b> and <b>discover</b> the scientific <b>vocabulary</b> and <b>concepts</b> which will be built on every year through our science curriculum.</p> <p><b>Plants-</b> basic plant growing needs, identifying differences between natural objects</p> <p><b>Everyday Materials-</b>Natural materials, material properties</p> <p><b>Animals-</b>Animal names, parts of animals</p> <p><b>Forces in motion-</b>Push and pull</p> <p><b>Humans-</b>Their own family, differences between families, naming important body parts, Using their senses</p> <p><b>Energy- light -</b>Light and dark, day and night</p> <p><b>and sound-</b> Recognising familiar sounds incl animal sounds</p> <p><b>Seasonal Changes-</b> changes in their environment throughout the year</p>					
Pre-school (3 year olds)	<p><b>Humans</b> Simple Life cycle (3 stages) Keeping themselves healthy</p>	<p><b>Energy- light and sound</b> Light and dark, day and night, shadows Creating sounds</p>	<p><b>Animals</b> Life cycles, identify and name baby animals and changes over time</p>	<p><b>Plants &amp; Animals</b> Key plant growing needs, features of natural environment Parts of a plant</p>	<p><b>Forces in motion</b> Using Push and pull to change the shape of some solid objects</p>	<p><b>Everyday Materials</b> Waterproof materials, natural and man-made materials</p>

	<i>Knowing their senses</i>					
<b>Seasonal Changes will run across the whole year and crosses over many of the areas of study above</b>						
<b>FIVE TYPES OF SCIENTIFIC ENQUIRY</b>	<b>Comparative / fair testing</b>		How do plants grow?			
	<b>Research</b>		What do plants need to grow? What do animals eat? Do all animals eat the same food? How does it work? How can we move objects?			
	<b>Observation over time</b>		Is every object made out of the same material? How does a puppy change over 12 weeks?			
	<b>Pattern seeking</b>		What colours can we find outside? Does this change across the seasons?			
	<b>Identifying, grouping and classifying</b>		Is every object made out of the same material?			
<b>Reception</b>	<b>Humans</b> <i>How they've grown and changed Managing their own hygiene and personal needs</i>	<b>Everyday Materials and changing Materials</b> <i>Heating and freezing water, identify natural and man-made materials</i>	<b>Animals</b> <i>Stages of a life cycle, different animal environments and behaviours</i>	<b>Plants &amp; Animals</b> <i>life cycles of plants, caring for the natural world</i>	<b>Energy- light and sound</b> <i>How the sun affects day and night, light sources, shadows Pitch, volume</i>	<b>Forces in motion</b> <i>Push and pull as a magnetic force, objects fall to earth</i>
<b>Seasonal Changes will run across the whole year and crosses over many of the areas of study above</b>						
<b>FIVE TYPES OF SCIENTIFIC ENQUIRY</b>	<b>Comparative / fair testing</b>		What do plants need to grow? How do animals change as they grow			
	<b>Research</b>		How do animals change as they grow? How does the environment change with			
	<b>Observation over time</b>		How does the environment change with the seasons?			
	<b>Pattern seeking</b>		How does rainfall and temperature change over time?			
	<b>Identifying, grouping and classifying</b>		What does it do? What is it for? Who would use it? Where is it from?			
<b>1</b>	<b>Seasonal changes</b> <i>Order and associated months, changes in daylight, associated weather</i>	<b>Everyday Materials</b> <i>Similarities and differences, properties, grouping materials</i>	<b>Humans</b> <i>Basic structure, body parts and senses</i>	<b>Animals</b> <i>Comparing and grouping</i>	<b>Plants</b> <i>Common names, basic structure and ongoing nature journal Deciduous and evergreen trees</i>	<b>Making Connections:</b> <i>investigating science through stories Revision and building on previous units</i>
<b>FIVE TYPES OF SCIENTIFIC ENQUIRY</b>	<b>Comparative / fair testing</b>		<b>Performing simple tests. Gathering and record data to help in answering questions.</b> Which of our senses is the most accurate at identifying food?			
	<b>Research</b>		<b>Asking simple questions and recognising that they can be answered in different ways.</b> Are all plants green? Do all animals hunt?			
	<b>Observation over time</b>		<b>Observing closely, using simple equipment.</b>			
	<b>Pattern seeking</b>		How does rainfall and temperature change over time in our school grounds?			
	<b>Identifying, grouping and classifying</b>		<b>Identifying and classify using observations and ideas to suggest answers to questions.</b>			

<b>2</b>	<b>Living things and their habitats</b> <i>Life processes, habitats, food chains</i>	<b>Micro-Habitats</b> <i>Mini-beasts</i>	<b>Uses of Everyday Materials</b> <i>Suitability of materials, different purposes</i>	<b>Animals including Humans</b> <i>Health and growth Survival and life cycles stages</i>	<b>Plants</b> <i>Growing plants, Seeds and germination</i>	<b>Making Connections:</b> <i>Plant based materials Revision and building on previous units</i>
<b>FIVE TYPES OF SCIENTIFIC ENQUIRY</b>	<b>Comparative / fair testing</b>		<b>Performing simple tests. Gathering and record data to help in answering questions.</b> Would a chocolate teapot really be so bad?			
	<b>Research</b>		<b>Asking simple questions and recognising that they can be answered in different ways.</b> Do plants flower all year round? How have animals and plants adapted to live in their habitats? Is plastic the best material for a window?			
	<b>Observation over time</b>		<b>Observing closely, using simple equipment.</b>			
	<b>Pattern seeking</b>		Do all animals grow and live the same way?			
	<b>Identifying, grouping and classifying</b>		<b>Identifying and classify using observations and ideas to suggest answers to questions.</b> Are all objects a living thing?			
<b>3</b>	<b>Animals including Humans</b> <i>Movement and skeleton, Health and nutrition.</i>	<b>Forces and magnets</b> <i>Friction, contact and non-contact forces, magnetic materials</i>	<b>Rocks and soil</b> <i>Fossils, grouping rocks, properties of rocks, formation of rocks and soils</i>	<b>Light and shadows</b> <i>Light sources, reflection, How and why shadows change linked to the sun</i>	<b>Plants</b> <i>Function of plant parts and growth All stages of plant life cycle including reproduction and pollination</i>	<b>Making Connections:</b> <i>Does hand span affect grip strength? Revision and building on previous units</i>
<b>FIVE TYPES OF SCIENTIFIC ENQUIRY</b>	<b>Comparative / fair testing</b>		<b>Set up simple practical enquiries, comparative and fair tests.</b>			
	<b>Research</b>		<b>Ask relevant questions and using different types of scientific enquiries to answer them.</b> How does soil affect how plants grow? Use secondary sources to explain your answer?			
	<b>Observation over time</b>		<b>Make systematic and careful observations and, where appropriate, taking accurate measurements using standard units, using a range of equipment, including thermometers and data loggers.</b>			
	<b>Pattern seeking</b>		<b>Identify differences, similarities or changes related to simple scientific ideas and processes.</b> <b>Use straightforward scientific evidence to answer questions or to support findings.</b> Can you find patterns in different people's diets to draw conclusions about how to eat healthily?			
	<b>Identifying, grouping and classifying</b>		<b>Gather, record, classify and present data in a variety of ways to help in answering questions. Record findings using simple scientific language, drawings, labelled diagrams, keys, bar charts, and tables.</b> Are all metals magnetic? How can scientists sort rocks? Use a comparative test to classify rocks based on their properties.			
<b>4</b>	<b>Animals including Humans</b> <i>Teeth and digestive system Food chains,</i>	<b>Electricity and circuits</b> <i>Power sources, conductors and insulators</i>	<b>States of Matter</b> <i>Properties of solids, liquids and gases, changing states, water cycle</i>	<b>Sound and vibrations</b> <i>vibrations Insulation and pitch</i>	<b>Living things and their habitats</b> <i>Biodiversity, classification and human impact on environments</i>	<b>Making Connections:</b> <i>How does the flow of liquids compare? Revision and building on previous units</i>

FIVE TYPES OF SCIENTIFIC ENQUIRY	<b>Comparative / fair testing</b>		<b>Set up simple practical enquiries, comparative and fair tests. Record findings using simple scientific language, drawings, labelled diagrams, keys, bar charts, and tables.</b> What effect does the food we eat and drink have on our teeth? Which materials make the best conductors or insulators? How can we find out?			
	<b>Research</b>		<b>Ask relevant questions and using different types of scientific enquiries to answer them.</b> What happens to the food we eat? How does sound travel?			
	<b>Observation over time</b>		<b>Make systematic and careful observations and, where appropriate, taking accurate measurements using standard units, using a range of equipment, including thermometers and data loggers.</b> How is the environment changing?			
	<b>Pattern seeking</b>		<b>Identify differences, similarities or changes related to simple scientific ideas and processes. Use straightforward scientific evidence to answer questions or to support findings.</b> How can we change the pitch or volume of a sound?			
	<b>Identifying, grouping and classifying</b>		<b>Gather, record, classify and present data in a variety of ways to help in answering questions. Record findings using simple scientific language, drawings, labelled diagrams, keys, bar charts, and tables.</b> How can living things be classified? How can you tell the difference between a vertebrate and an invertebrate?			
5	<b>Mixtures and separating materials</b> <i>Dissolving, solutions, filtering, sieving, evaporation</i>	<b>Material properties and changes</b> <i>solubility, transparency, conductivity, magnetism Reversible and irreversible,</i>	<b>Earth and space</b> <i>Our solar system, Movement and position of the sun, moon, planets</i>	<b>Unbalanced forces</b> <i>gravity, air resistance, water resistance, how mechanisms affect force</i>	<b>Living Things and their Habitats</b> <i>Reproduction, Life cycles and habitats</i>	<b>Humans Timelines</b> <i>(short unit)</i> <i>Stages of growth and development and gestation</i> <u>Making Connections:</u> <i>(short unit)</i> Does the size of an asteroid affect the diameter of it's impact crater? <i>Revision and building on previous units</i>
FIVE TYPES OF SCIENTIFIC ENQUIRY	<b>Comparative / fair testing</b>		<b>Plan different types of scientific enquiries to answer questions, including recognising and controlling variables where necessary. Use test results to make predictions to set up further comparative and fair tests.</b> How do forces affect the speed of an object?			
	<b>Research</b>		<b>Identifying scientific evidence that has been used to support or refute ideas or arguments.</b> How important is the work of naturalists such as David Attenborough and Jane Goodall?			
	<b>Observation over time</b>		<b>Report and presenting findings from enquiries, including conclusions, causal relationships and explanations of and degree of trust in results, in oral and written forms such as displays and other presentations.</b> How do plants and animals change over time?			

	<b>Pattern seeking</b>	<b>Take measurements, using a range of scientific equipment, with increasing accuracy and precision, taking repeat readings when appropriate.</b> Are the life cycles of plants and animals in the local environment the same as in other habitats around the world?				
	<b>Identifying, grouping and classifying</b>	<b>Record data and results of increasing complexity using scientific diagrams and labels, classification keys, tables, scatter graphs, bar and line graphs.</b> What material properties could be used to sperate and identify solids, liquids and gases?				
<b>6</b>	<b>Living things and their habitats</b> <i>Classification</i>	<b>Light and reflection</b> <i>How we see things, Changing the direction of light, Shadows and reflective surfaces</i>	<b>Evolution and inheritance</b> <i>Adaptations and evolution, fossils</i>	<b>Humans (Animals)</b> <i>Circulatory system, organs and exercise</i>	<b>Electricity- Circuits, batteries and switches</b> <i>Circuit diagrams, changing circuits and circuit components</i>	<b>Making Connections:</b> <i>Are some sunglasses safer than others? Revision and building on previous units</i>
<b>FIVE TYPES OF SCIENTIFIC ENQUIRY</b>	<b>Comparative / fair testing</b>	<b>Plan different types of scientific enquiries to answer questions, including recognising and controlling variables where necessary. Use test results to make predictions to set up further comparative and fair tests.</b>				
	<b>Research</b>	<b>Identifying scientific evidence that has been used to support or refute ideas or arguments.</b> How can fossil evidence be used to support the theory of evolution?				
	<b>Observation over time</b>	<b>Report and presenting findings from enquiries, including conclusions, causal relationships and explanations of and degree of trust in results, in oral and written forms such as displays and other presentations.</b>				
	<b>Pattern seeking</b>	<b>Take measurements, using a range of scientific equipment, with increasing accuracy and precision, taking repeat readings when appropriate.</b> What happens when you add more bulbs or batteries etc to a circuit?				
	<b>Identifying, grouping and classifying</b>	<b>Record data and results of increasing complexity using scientific diagrams and labels, classification keys, tables, scatter graphs, bar and line graphs.</b> To what extent has Charles Linnaeus' theory of classification impacted how people define animals and plants today.
